1.Desklog Dashboard

When you log into Desklog, the first screen you see is your **Desklog dashboard**, designed to give you a complete overview of your team's productivity while supporting a healthy work-life balance.

2. Work Analytics: Insights That Empower

. Total Working Hours – Understand how much time your team spends at work.

- **Productivity Hours – Track the time actively spent on tasks.**
- **Task Time – See the total duration spent on completing assigned tasks.**
- **Focus Percentage – Get an overview of overall team efficiency.**

3. Understanding Time at Work vs. Productive Time

Desklog tracks multiple metrics to help users understand their workflow:

- **Clock In/Clock Out** – Track arrival and exit times, or "online" if logged in.
- **Time at Work** – Total time in the workplace, including both productive and non-productive periods.

- **Productive Time** – Time actively spent working on tasks; idle periods are excluded.
- **Idle Time** – Time away from the keyboard or mouse.
- **Offline Time** – Time spent without an internet connection.
- **Private Time** – Time when logged out

Desklog offers two main interfaces:

- **User Interface (Employee Interface):**

This is a desktop application where employees track their work time and activities. It includes features like a timer, project/task selection, productivity status, and activity logs. Employees can start or stop the timer, add tasks, and view summaries of their work.

- **Admin Interface (Manager/Admin Dashboard):**

This is a web-based dashboard accessible through a browser. Admins and managers can monitor employee productivity, attendance, app and website usage, and generate detailed reports and analytics. They can also manage tasks, projects, user roles, billing, integrations, and other settings.

Desklog Research Document

1. Introduction

Desklog is a workforce management application that helps organizations automatically track employee work hours, attendance, productivity, tasks, and projects. It provides real-time insights through desktop and web applications, enabling both employees and managers to monitor work efficiently.

---

2. Objectives

- Automate employee time tracking.
- Improve productivity and work efficiency.
- Simplify attendance management.
- Manage projects and tasks effectively.
- Generate reports and analytics.

- Support remote, hybrid, and office work environments.

---

3. Core Features

- Automatic Time Tracking
- Clock In / Clock Out
- Attendance Management
- Project Management
- Task Management
- Productivity Monitoring
- Idle Time Detection
- Leave Management
- Reports & Analytics
- Employee Dashboard
- Admin Dashboard

---

4. User Roles

Admin

- Manage users and teams
- Create projects
- Assign tasks
- View reports and analytics
- Configure system settings

Manager / Team Leader

- Manage team members
- Assign and monitor tasks
- View productivity reports
- Approve leave requests

Employee

- Track work hours
- Manage assigned tasks
- View personal dashboard
- Apply for leave
- Update profile

---

5. Time Tracking Workflow

1. User logs into the Desklog Desktop Agent.
2. User performs **Clock In**.
3. Time tracking starts automatically.
4. System records productive time, idle time, and application usage.
5. User performs **Clock Out**.
6. Daily work summary is generated on the dashboard.

---

6. Dashboard Overview

The Desklog dashboard provides:

- Time at Work
- Productive Time
- Focus Percentage
- Activity Percentage
- Clock In / Clock Out
- Task Progress
- Productivity Graphs
- Project Hours
- Team Performance

---

7. Project & Task Management

Desklog enables users to:

- Create and manage projects
- Assign tasks to employees
- Track task completion time
- Compare assigned time with actual time
- View tasks in List and Kanban views

---

8. Leave Management

Employees can:

- Apply for leave
- View leave balance
- Check company holidays

Managers can approve or reject leave requests.

---

9. Productivity Monitoring

Desklog monitors employee activity by analyzing:

- Keyboard and mouse activity
- Productive applications
- Non-productive applications
- Neutral applications
- Focus percentage
- Activity percentage

---

10. Reports & Analytics

Desklog generates:

- Daily, Weekly, and Monthly Reports
- Attendance Reports
- Productivity Reports
- Project Reports

- Task Reports
- Billable Hours Reports

These reports help managers evaluate employee performance and project progress.

---

12. Benefits

- Automated work-hour tracking
- Accurate attendance management
- Improved employee productivity
- Better project visibility
- Simplified task management
- Data-driven decision making
- Comprehensive reporting and analytics

---

13. Conclusion

Desklog is a comprehensive workforce management solution that combines time tracking, attendance, task management, project monitoring, productivity analysis, and reporting into a single platform. It helps organizations improve operational efficiency, monitor employee performance, and make informed management decisions through real-time dashboards and detailed analytics.

Missing Features in WorkTrack Management (Compared to Desklog)

1. Attendance Management (High Priority)

Currently missing:

- Clock In
- Clock Out
- Attendance Calendar
- Daily Attendance Report
- Shift Management
- Minimum Working Hours

- Overtime Calculation
- Late Arrival Tracking
- Early Logout Tracking
- Attendance History

2. Time Tracking (High Priority)

Current design only shows task information.

Missing:

- Automatic Time Tracking
- Running Work Timer
- Task Timer
- At Work Time
- Productive Time
- Task Spent Time
- Focus Percentage
- Manual Start/Stop Timer
- Billable Hours
- Non-Billable Hours

---

3. Website / URL Tracking

Missing:

- Website Usage
- Productive Websites
- Non-Productive Websites
- Neutral Websites
- Time Spent Per Website
- URL Categories

Example:

- GitHub

- Stack Overflow
- ChatGPT
- YouTube

---

4. Offline Time Tracking

Missing:

- Offline Work Tracking
- Local Data Storage
- Auto Synchronization
- Offline Duration

---

5. User Status

Missing:

- Online Users
- Offline Users
- Idle Users
- On Leave Users
- Present Users

---

6. Client Management

Missing:

- Create Client
- Client Details
- Client Projects
- Client Reports
- Billing Information

---

7. Leave Management

Missing:

- Apply Leave
- Leave Approval
- Leave Calendar
- Leave Balance
- Company Holidays
- Leave Reports

---

8. Project Module

Current project module needs:

- Project Milestones
- Project Timeline
- Budget
- Billable Hours
- Client Information
- Recent Activity
- File Management
- Project History

---

9. Reports

Need:

- Daily Report
- Weekly Report
- Monthly Report
- Attendance Report
- Productivity Report
- Project Report
- Task Report

- Employee Report
- Billable Hours Report
- Export to PDF
- Export to Excel
- Export to CSV

---

10. Analytics

Need:

- Work Analytics
- Team Analytics
- Project Analytics
- Employee Analytics
- Productivity Analytics
- Trend Analysis
- Comparison Charts

---

11. Notifications

Need:

- Task Assigned
- Task Updated
- Task Completed
- Project Updated
- Leave Approved
- Deadline Reminder
- Mention Notification
- System Notification

---

12. Settings

Current settings only include profile management.

Need:

- Company Settings
- Working Hours
- Time Tracking Settings
- Notification Settings
- Productivity Rules
- Screenshot Settings
- Holiday Settings
- User Roles
- Permissions

---

13. Search & Filters

Need:

- Global Search
- Project Filter
- Team Filter
- Employee Filter
- Date Filter
- Status Filter
- Priority Filter
- Custom Filters

---

14. Dashboard Charts

Need:

- Attendance Chart
- Billable Hours Chart

---

15. Activity Timeline

Need:

- Login Time
- Logout Time
- Task Started
- Task Completed
- Idle Sessions
- Screenshot Timeline
- Application Timeline

---

16. Security Features

Need:

- Audit Logs
- Login History
- Session Management
- Two-Factor Authentication (2FA)
- Password Policy
- IP Restriction (optional)
